AHS Mushroom Compost Specification

AHS are proud to have been supplying the UK landscape industry with quality composts for over 25 years.

AHS Mushroom Compost is a recycled by-product of the mushroom growing industry, it contains a blend of straw and animal manure. Spent Mushroom Compost will improve soil structure by adding organic matter, increasing available nutrient levels and generally benefitting soil fertility. It is not suitable for lime-hating plants such as camellias, azaleas, rhododendrons and heathers.

Application Rate:

We recommend that all our mulches are laid at a depth of between 50 & 100mm to obtain the best results.

Available In:

- Bulk Bags
- Bulk Loose

Features:

- Friable, and easy to spread
- Increases your soil's physical structure
- Blended agricultural straw and animal manure
- 100% natural product and contains no additives or colouring
